# ABOUT THE DITA MANNEQUIN

DITA corset and lingerie dress form was created specifically for working with corsages, corsets and outerwear with these elements.

*01* Corset and lingerie dress form Dita by IMINERA was created in collaboration with the world-famous fashion designer of bridal dresses and corsets, haute couture dresses - Olga Kaurtseva.

*02* Each line of the torso and cover is verified for accuracy and ease of construction

*03* One of the important features of this model: the construction of corsets on the thin waist of the dress form by the method of tattooing allows the product to fit accurately without unnecessary fitting, immediately taking into account the tightening of the waist by the product.

*04* An equally important detail is the shape of the chest. It has a hollow and meets all the beauty standards of a modern woman.

*05* The anatomical forms of the torso are as close as possible to real female figures. Due to the initially accurate construction of the base, the number of necessary adjustments to the product is reduced.

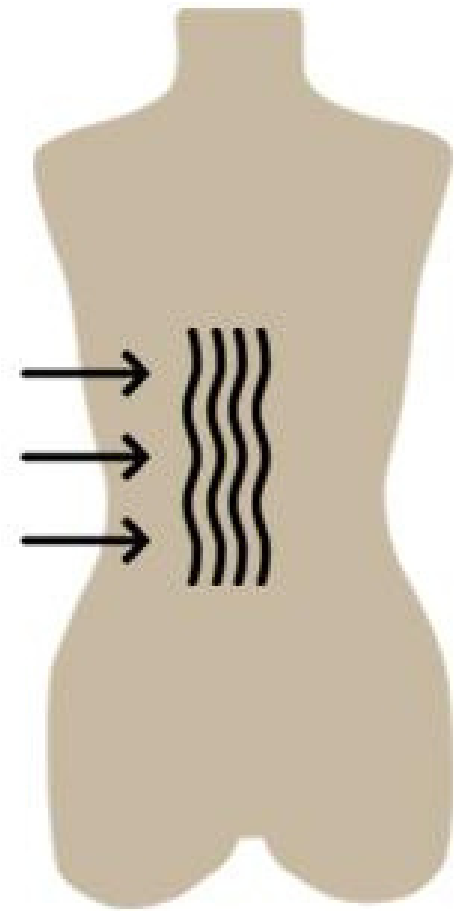

*06* Tailoring of underwear, corsets and corsages is getting much faster and better.

*07* Lines of constructive segmentation have been added to the cover of the model, which serve as an auxiliary tool when creating a pattern using a mock-up method. There is no analogue of this mannequin.

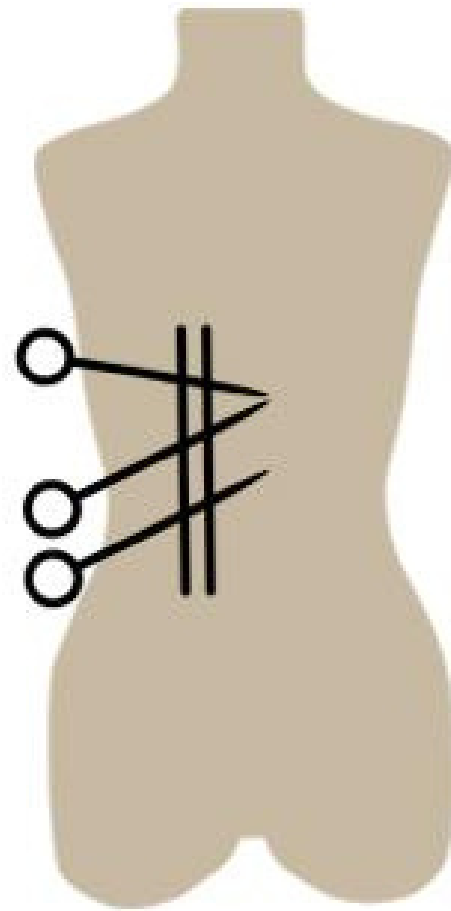

*08* Despite the fact that it has the necessary parameters for sewing corsets, you can put any material on a mannequin, whether it be shoulder, upper range or light dress.

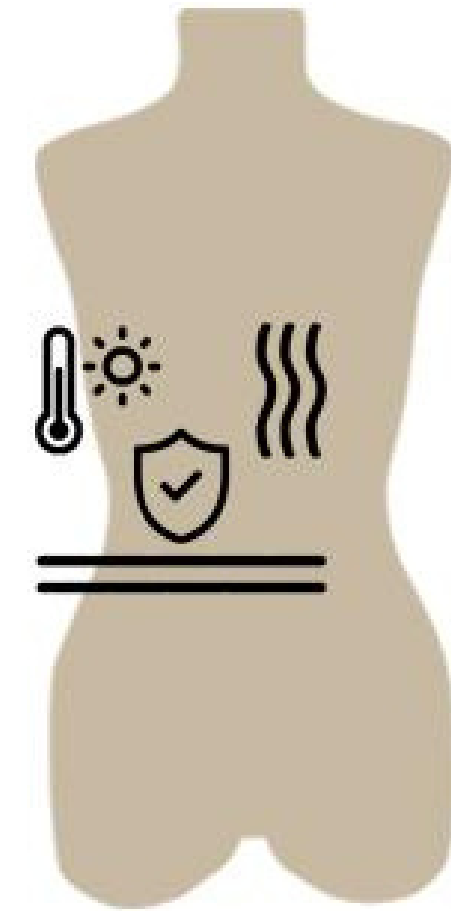

# DURING WORK YOU CAN:

Squeeze the torso

Put in the pin by any angle to any depth

Iron right on the torso

# DITA DRESS FORM IN DETAILS

## *01* BASIS MATERIAL IS SOFT POLYURETHANE FOAM

It is used for the production of many products: from mattresses and car interior parts to children's toys. It is water and steam resistant. Needles can be pinned at any angle and to any depth. It also suits for steam ironing directly on the dress form.

## *02* ANTHROPOMETRIC PARAMETERS

The anthropometric parameters of the torsos are the result of many years of practical experience of IMINERA engineers. Actual parameters of the updated Quality standards were used in the design.

## *03* SPECIAL ACCENT ON THE BUST AND WAIST PARAMETERS

The shape of the torso was designed for sewing corsets, corsages and underwear. Waist is reduced for 6 centimeters from typical measurements for imitation of tightening of corsets. All key anthropometric points of the chest are indicated by the cut lines of the torso cover.

## *04* UNIQUE COVER

The design lines of the removable cover considers the features of working with the corset and underwear group of garments. The basic marking lines are supplemented with alternative ones for making graceful shapes and decorative elements:

- adjusted distance between cups
- braces construction lines
- special design of the relief
- horizontal lines limiting the height of corset bones

# COLOR SPECTRUM

## NUDE BEIGE

The combination of a neutral light shade with the texture of a diagonal weave of a fabric is the perfect basis for your creativity! DITA in Nude Beige is incredibly photogenic. It is convenient to try on, work with tattoos, steam finished garments, and also demonstrate finished products.

# SIZE CHART

Name	Bust	Under Bust	Waist	Hips	Center-back	Center-front	Center-breadth	Chest breadth	Back breadth	Cup Arc
Dita42	84	73	61,5	92	41,5	45	16	29,5	33,1	17,2
Dita44	88,5	75	65	96	41,8	46	17	31	34,1	18,3
Dita46	92	78	68	99	42	47	18	32	34,8	20,5
