

KIDS

In addition to rapid growth, a child's body differs from an adult's in its proportions. As the child grows up, the round shapes gradually stretch out, the shape of the tummy and the ratio of the torso length to the total body length change. When developing IMINERA KIDS sewing dummies, we took into account the peculiarities of modern children's figures of different ages.

Kids

The more often a tailor sews clothes for children, the stronger the need to buy a soft tailor's dress form. In a workshop or atelier for sewing children's clothing, you simply cannot do without it. The line includes 7 sizes of sewing dress forms with parameters for children from 1 to 13 years old. The step between the sizes is 2 years. Meets the requirements of the standards for a typical figure.

SIZE	MEASUREMENTS / CM				
	Height	Bust	Waist	Hips	Curve
1+	75-80	51	49	51	80
3+	93-98	54	51	56	91
5+	105-110	56	53	61	99
7+	117-122	62	56	65	109
9+	129-134	66	59	69	119
11+	141-146	72	62	75	127
13+	154-159	77	65	83	139

Realistic anatomy

The shape of the dress form follows the features of the child's body. Actual back deflection. Full shoulder girdle. Natural belly and buttocks. The beginning of the arms helps to build the sleeves, while the elastic material allows you to put on and take off even the narrowest garments without any extra effort. The beginning of the legs.

Dress form torso materials

The base of the torso is made of polyurethane foam. The torso is resilient and easily takes on its original shape after compression. The cast monolithic base is resistant to the effects of needles, moisture, and temperature. You can work on the mannequin using the draping method, ironing.

Inside the torso, there is a hidden attachment system on the stand, which prevents the dress form from loosening and deforming even with prolonged use.

The detachable Kids cover is made of jersey. The color of the cover in our milk jersey line for kids is the perfect base for your garments and photos! The neutral shade is the perfect base for your creative pursuits and finished product displays.

Purpose of the Kids dress form

Among the masters, there is an opinion that a children's tailor's dress form is a thing, if not useless, then definitely not the most important one in. But if a tailor sews for children more often than for adults, it is simply necessary to buy a children's tailor's dress form. Reasons why it is easier to work with a dummy than with a live child:

- stands motionless and does not strive to escape from fitting or at the sight of a needle;
- he does not need to be persuaded to put on clothes if he is not in the mood;
- any number of pins and needles can be injected into the dress form's torso;
- can be raised to the desired height, placed or placed on the table;
- ironing and steaming on a child will not work, but on a soft dummy, it is easy.

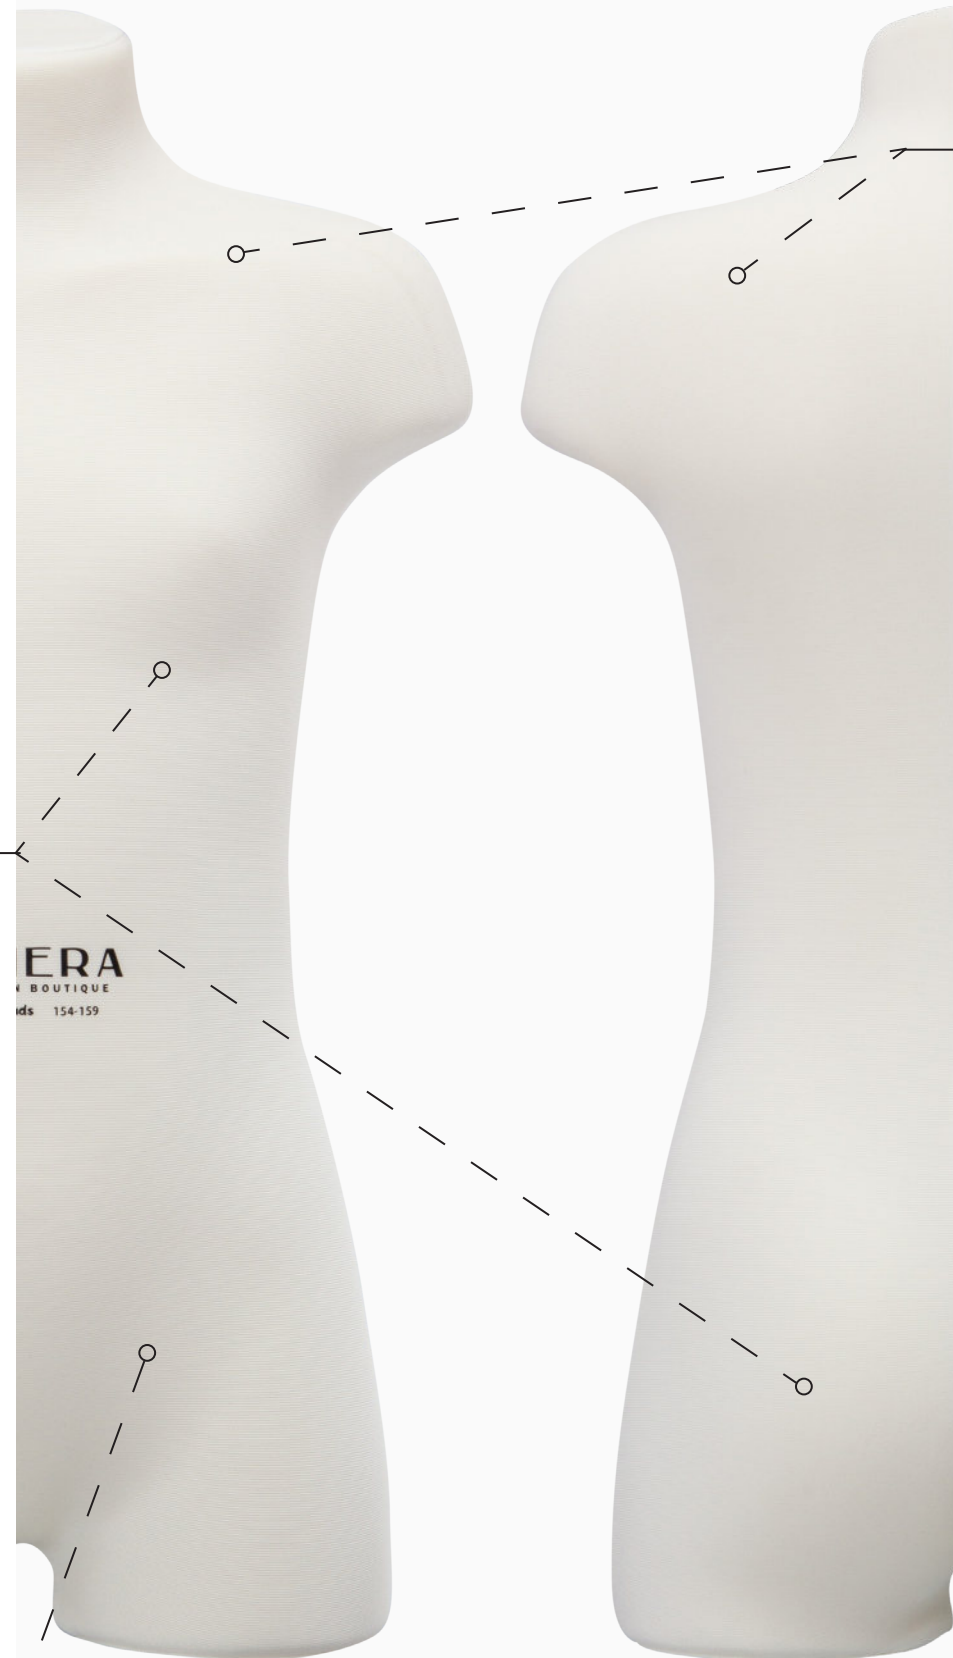

Kids in detail

As the child grows up, the round shapes gradually stretch out, the shape of the tummy and the ratio of the torso length to the total body length change. Children's dressmakers are as anatomical as possible, they repeat the natural lines of the child's body.

The beginning of the legs of the dress forms helps in the construction and sewing of the products of the waistband, swimsuits, and underwear. Legs, settings, and distances between them are verified and built based on real data.

The shoulders with the beginning of the arms will come in handy when working with sleeves. Thanks to the softness and elasticity of the base, tight-fitting garments are as easy to put on the shoulders as they are loose.

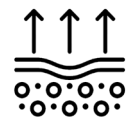

The line includes 7 sizes of sewing dress forms with parameters for children from 1 to 13 years old. The step between the sizes is 2 years. ■

Cover color: Milk Jersey

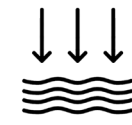

The color of the cover of Kids line milk jersey is the perfect base for garments and photographs! The neutral shade will be the ideal basis for creative searches and displays of finished products.

The porous structure of the base allows for quick recovery after compression.

The pins can be injected to the full depth of the torso at any angle.

The soft material allows you to grip the torso when removing and donning tight-fitting garments.

Resistant to steam and temperature, it fits perfectly for steam ironing.
