

SPORT KIDS

Sport Kids by the IMINERA company is a soft dress form for sewing children's suits for children with a sports figure. The line is the result of a collaboration with Svetlana Gerasimova, the author of swimwear designs for world-class athletes and the undisputed leader of the industry.

Sport Kids

Soft dress forms are perfect for sewing gymnastic suits. When sewing a gymnastic leotard, the tailor must take into account all the rules of the regulations and accurately fit the product to the figure for the comfort of the athlete. The slightest inaccuracy in the cut can create an ugly fold or chafe an uncomfortable seam. A dress form for sewing gymnastics suits is always ready to help with fitting, fitting, and even modeling using the draping method.

SIZE	MEASUREMENTS / CM				
	Height	Bust	Waist	Hips	Curve
S4+	104	53	43	55	95
S6+	115	56	49	58	100
S8+	125	57	50	60	105
S10+	135	64	55	65	112
S11+	144	65	56	68	120
S12+	154	75	59	77	128
S13+	164	80	62	82	137
S14+	170	84	68	87	144
S15+	170	87	67	88	150

Realistic anatomy

Children's tailor's torsos differ from typical dress forms in taut shapes, sporty posture, and well-defined lumbar deflection. Dress form torsos with hip and start of the legs also constructed taking into account the anatomy of the child's sports body.

The shoulders are extended. The shoulder blades are removed. Full shoulder girdle. Tucked up belly. The precise anatomy of the hips and buttocks. Narrowed waistline. Symmetry about the center seam. Extended gusset. Flatback and actual lumbar deflection. The dummies of the entire row have the posture of performing athletes with typical parameters.

Dress form torso materials

The base of the torso is made of polyurethane foam. The torso is resilient and easily takes on its original shape after compression. The cast monolithic base is resistant to the effects of needles, moisture, and temperature. You can work on the dress form using the draping method, ironing. Inside the torso, there is a hidden support system that prevents the dummy from loosening and deforming even after prolonged use.

The removable Sport Kids cover is made of smooth neoprene in a shade similar to tanned skin. The dress form does not distract attention from the outfit, which is important when working with decor and translucent fabrics.

Purpose of the dress form

When creating elegant looks, every detail and a clear fit are important. The master does not always have the opportunity to work with a live model or a customer. Often the clients of costume tailoring shops are located in another city or even country, and fitting becomes physically impossible. To work with such customers, you just need to buy a sewing dummy. On the torso, you can drape, try on, decorate costumes, and also demonstrate the appearance of the finished product.

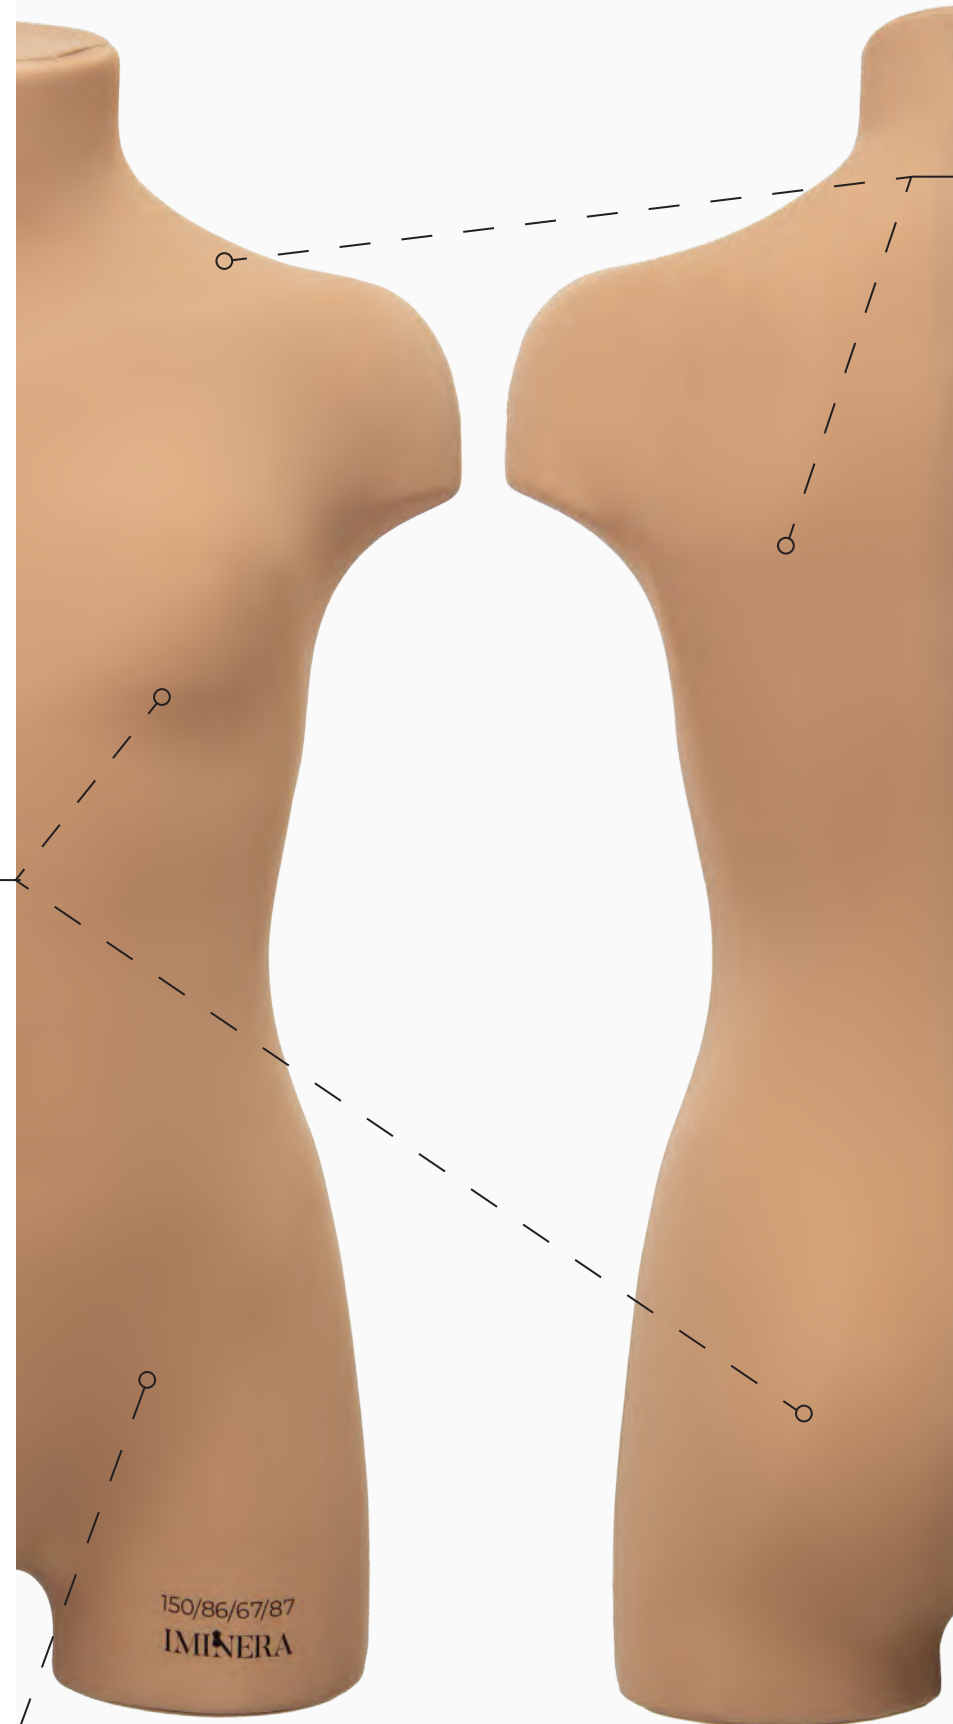

Dance Kids in detail

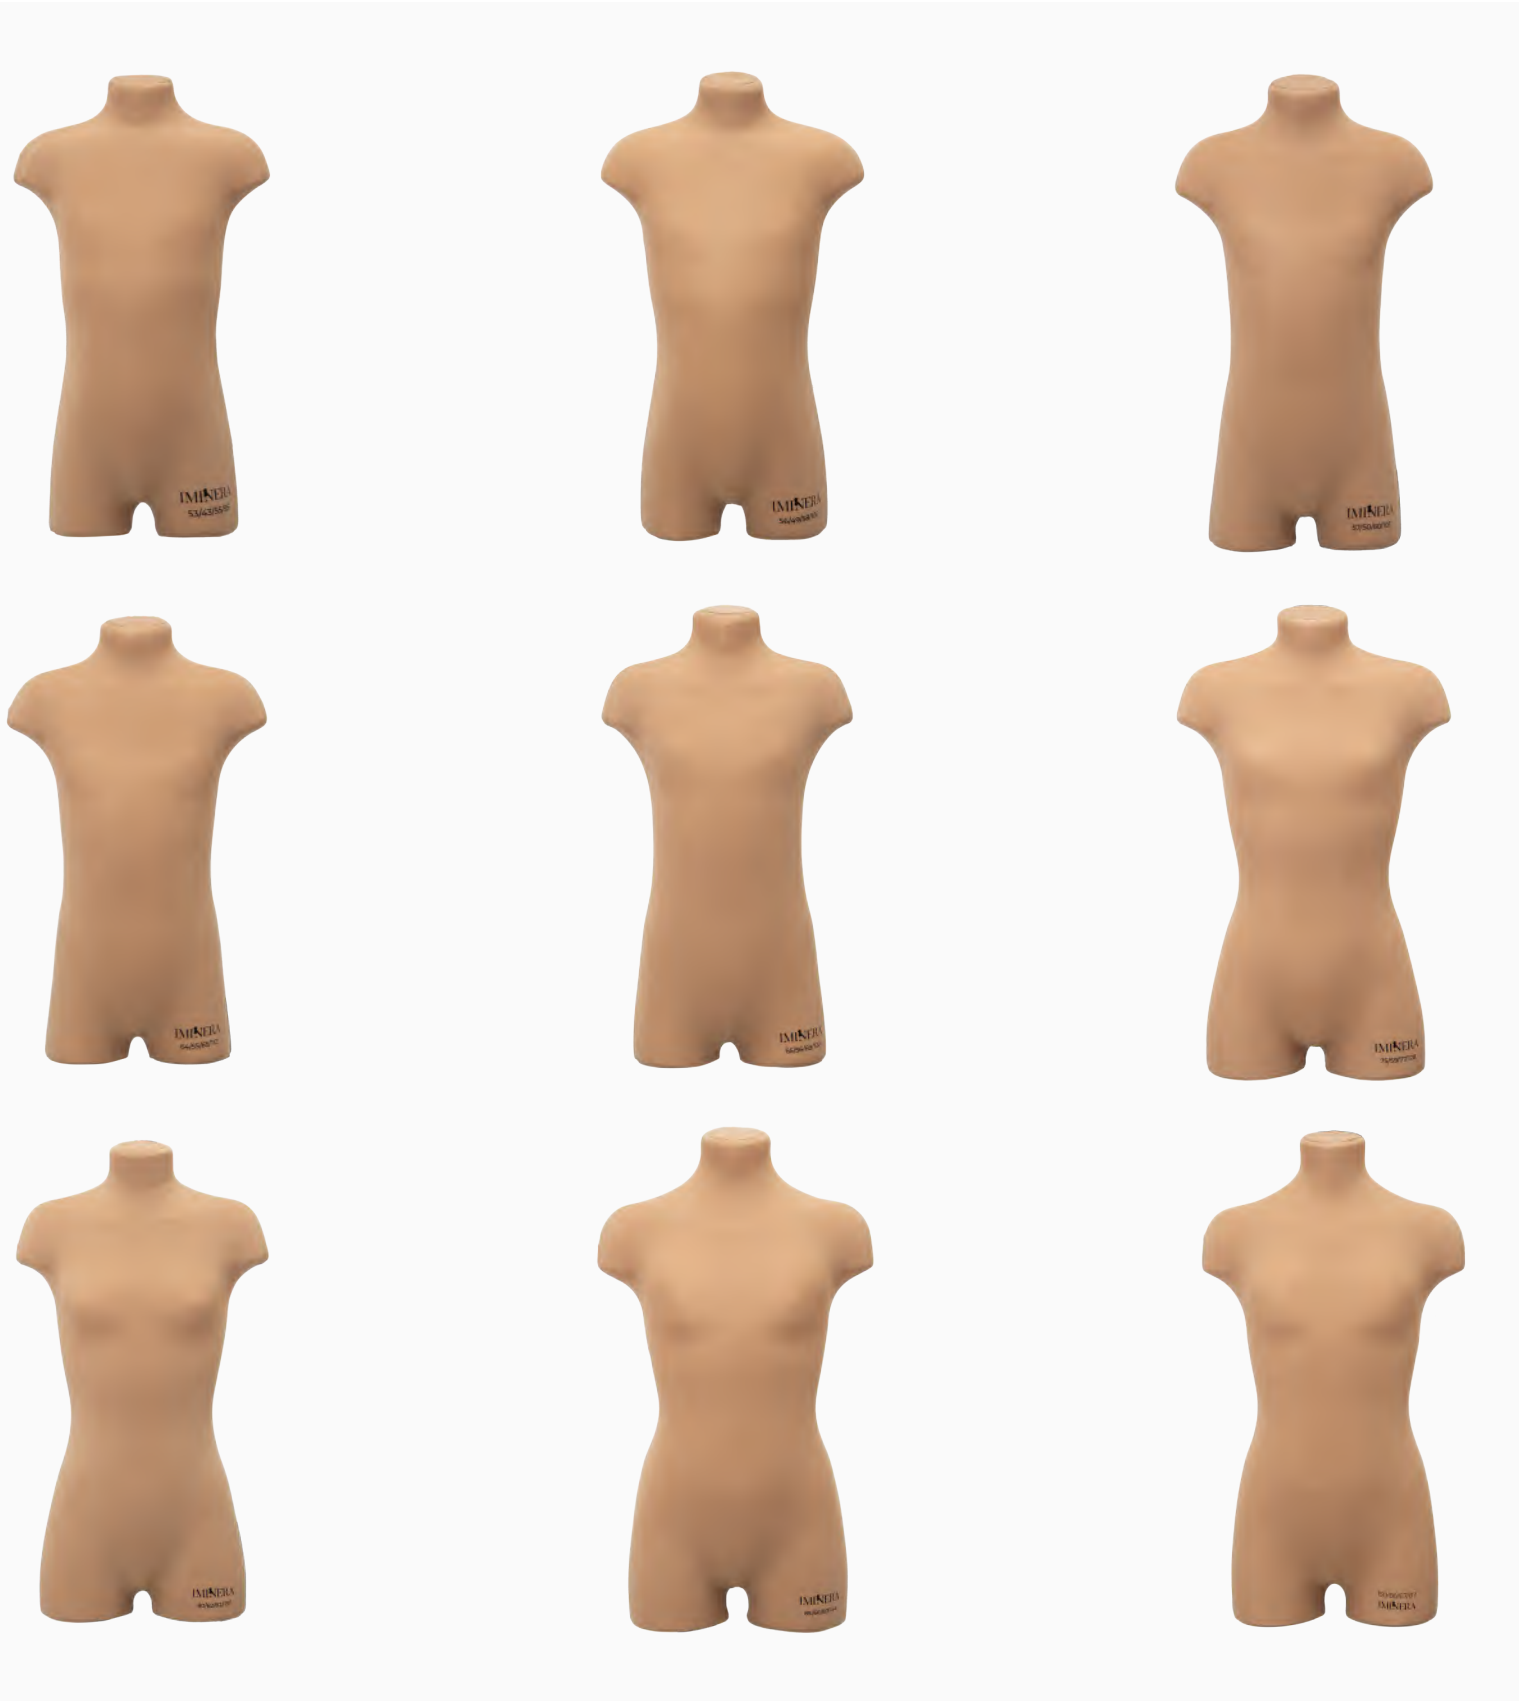

The figure of a child playing sports is different from the usual structure of a child's body. The lines of the abdomen and back are much smoother, the chest is higher.

The beginning of the legs of the dress forms helps in the construction and sewing of the products of the waistband, swimsuits, and underwear. Legs, settings, and distance between them are verified and built based on real data.

The shoulders with the beginning of the arms will come in handy when working with sleeves. Thanks to the softness and elasticity of the base, tight-fitting garments are as easy to put on the shoulders as they are loose.

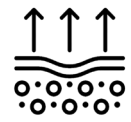

With the help of a dummy, you can create and try on gymnastics suits with an arc from 95 cm to 150 cm. The model range consists of 9 dummies. ■

Cover color: Bronze beige

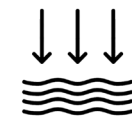

The color of the covering of the dress forms is Bronze beige. We chose this neoprene shade as a symbol of athletic bodies: tanned and shiny. Tracksuits and clothing for professional gymnastics look particularly advantageous and bright.

The porous structure of the base allows for quick recovery after compression.

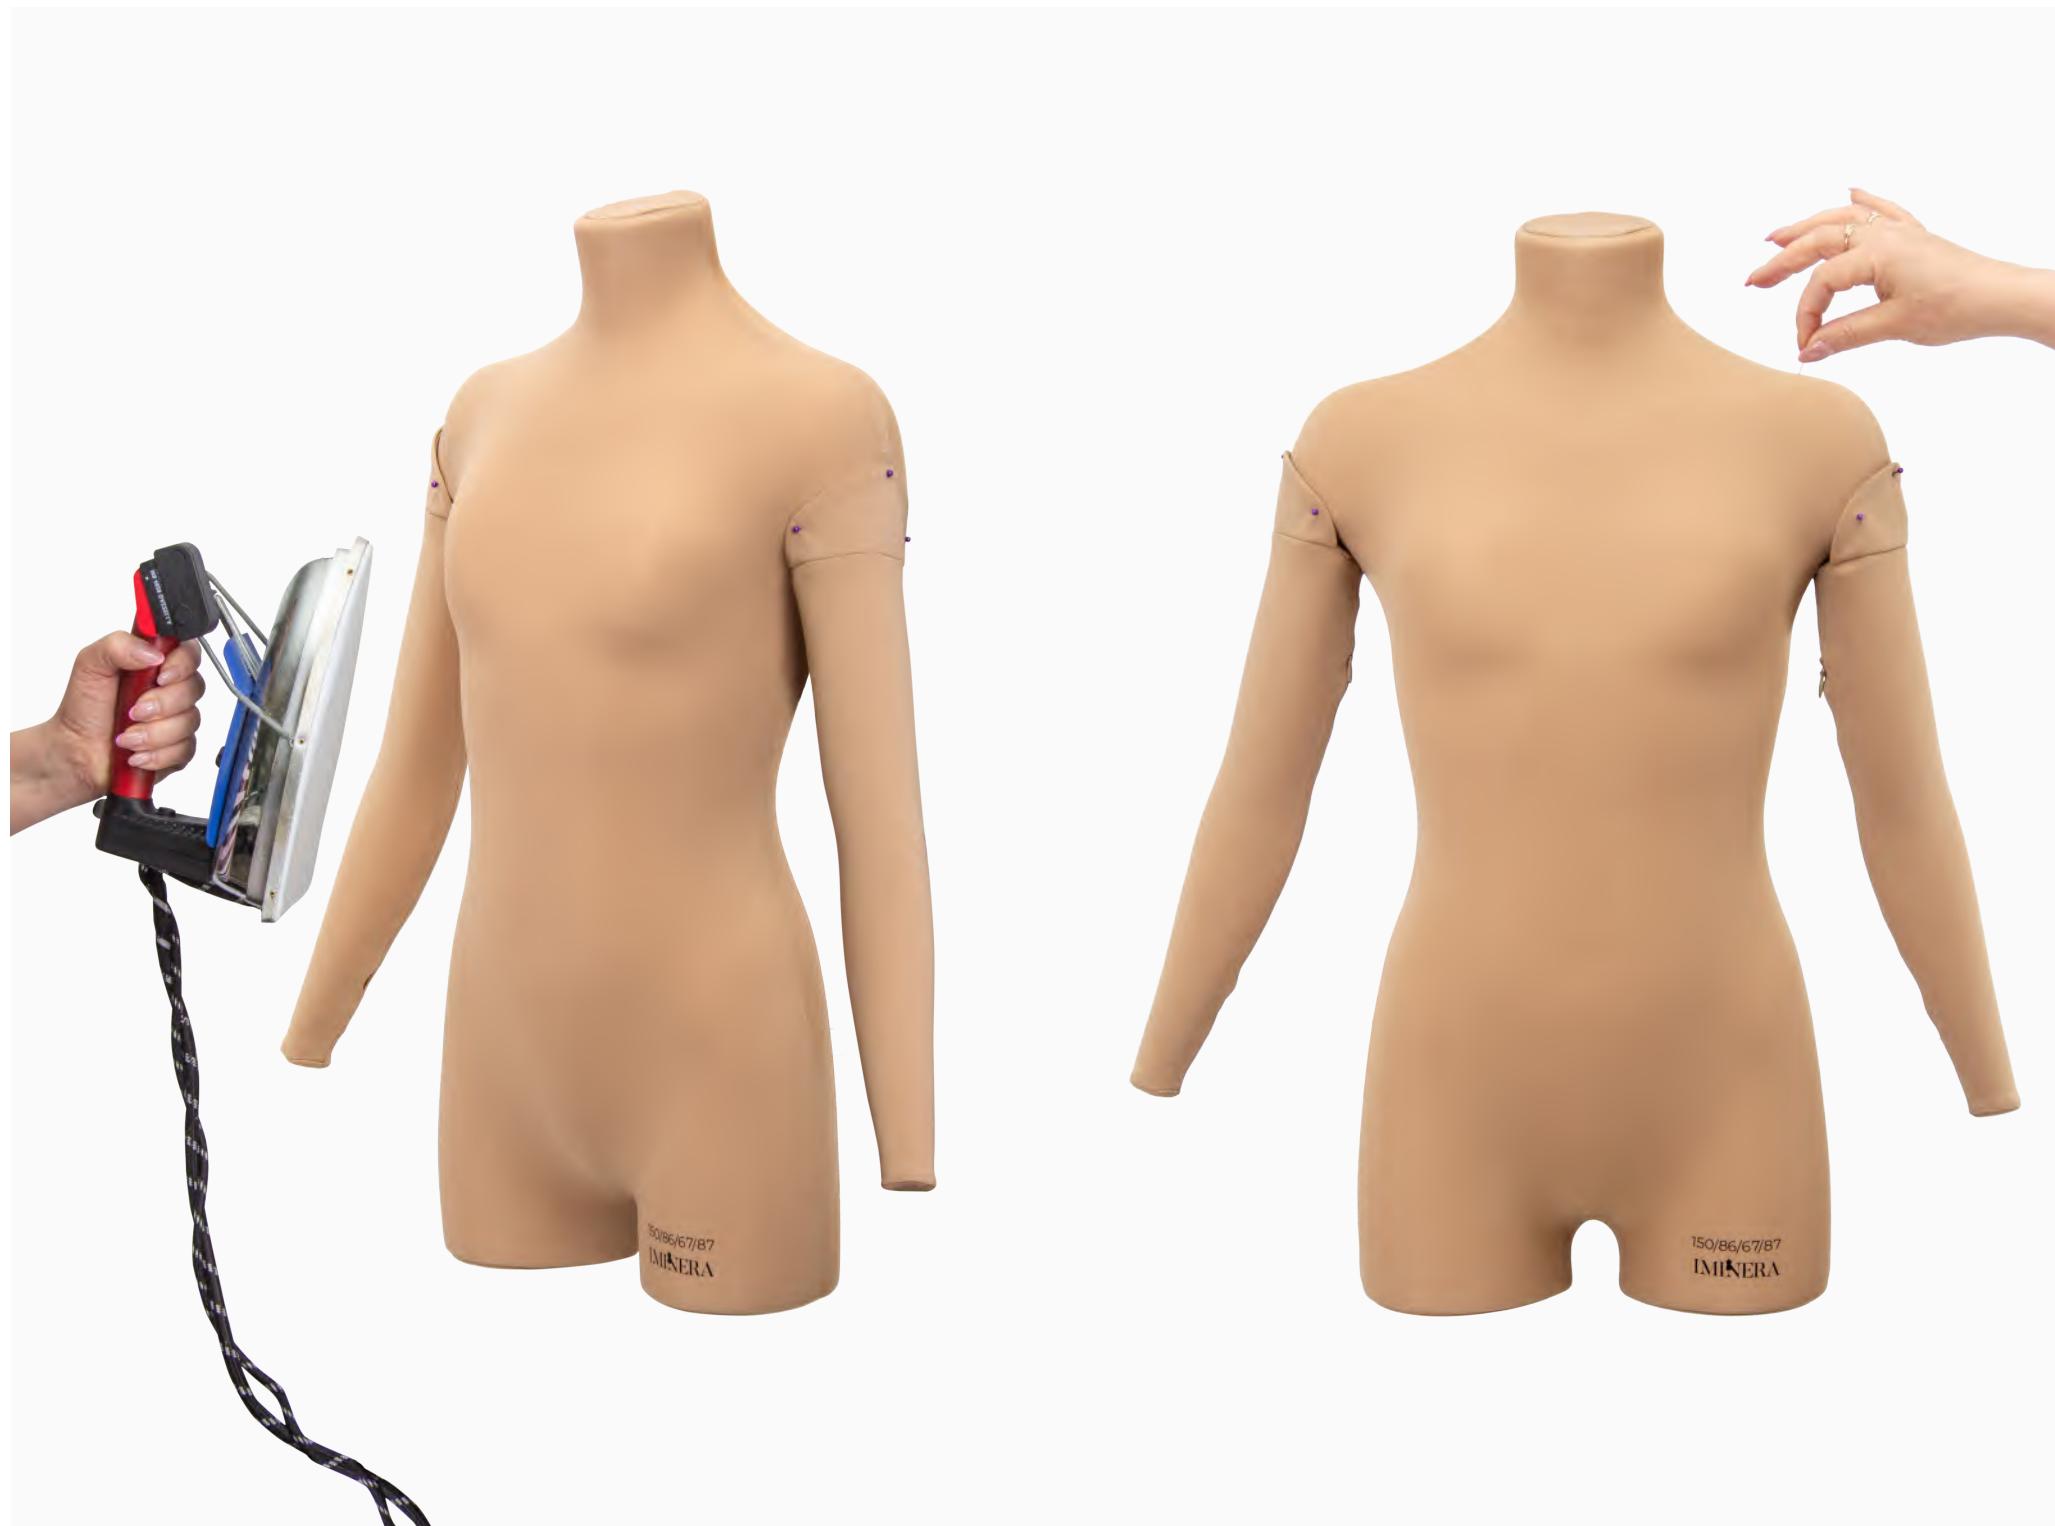

The pins can be injected to the full depth of the torso at any angle.

The soft material allows you to grip the torso when removing and donning tight-fitting garments.

Resistant to steam and temperature, it fits perfectly for steam ironing.
