

TAILOR CLAPPER

Tailors pressing board by Iminera

High-quality sewing of clothes is impossible without ironing. Tailors pressing boards are designed to help steam and iron out the most difficult-to-reach seams.

Pressing boards

The Iminera assortment includes a variety of pressing items, with which no seam will remain un-ironed.

The sewing pressing board is the key to the perfect ironing

Getting to the most difficult corners and steaming the seams in them can be difficult. But with the right tailor's board, the task becomes much easier.

Interoperative and final steaming with tailor's boards for steaming treatment gives the product completeness.

In the arsenal of a sewing master, you can find tailor's boards of various shapes and sizes. Each sewing block is designed for sewing specific parts or seams of a garment.

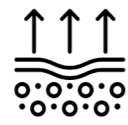

Tailorsin detail

Author's manufacturing technology and combination of materials:

▪ Base - supporting parts made of solid beech/pine wood. The porous structure and high density of the wood drain off steam instantly.

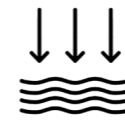

▪ Filler - polyurethane foam. The soft and lightweight material allows needles to be driven into the filler to form parts. In the process of constant work, it retains its original properties.

The porous structure of the base allows it to quickly regain its shape after compression.

Needles can be inserted to the full depth at any angle.

The soft material allows compression of the torso when taking off and putting on tight-fitting clothing.

Resistant to steam and temperature – can perform wet-heat treatment on the torso.

Universal

(without covering)

About the product

Purpose: Ironing seams on different parts of the product. To steam hard-to-reach areas, corners. Stitching seams.

Base material: solid beech wood board. The tree quickly picks up steam and press seams, as well as any shape.

Cover material: teak

Dimensions: 13.5cm (width) * 33cm (height)

Unpacked weight: 0.8 kg

Universal (wraparound)

About the product

Purpose: Ironing seams on different parts of the product. To steam hard-to-reach areas, corners. Stitching seams.

Base material: solid beech wood board. The tree quickly picks up steam and press seams, as well as any shape.

Cover material: teak

Dimensions: 13.5cm (width) * 33cm (height)

Unpacked weight: 0.8 kg

Ironing board

About the product

Purpose: carrying out wet heat treatment of various units and shapes products.

Base material: solid wood pine, filling - synthetic. Otto-gives off steam and press-in seams, as well as any shapes. Needles can be injected into the filler to form parts.

Cover material: jersey.

Dimensions: 42 cm (length) 21 cm (width) 20 cm (height)

Unpacked weight: 3.3 kg

Shoulder pad

About the product

Purpose: ironing and steam treatment of the sleeve, shoulder seams.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 34cm (length) * 19.5cm (width) * 30cm (height)

Unpacked weight: 1.3 kg

Sleeve Ham

About the product

Purpose: carrying out steam treatment of various units and shapes of the product. From darts to side seams.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 48cm (length) * 18cm (width) * 26cm (height)

Unpacked weight: 2.5kg

Collar

(2-in -1)

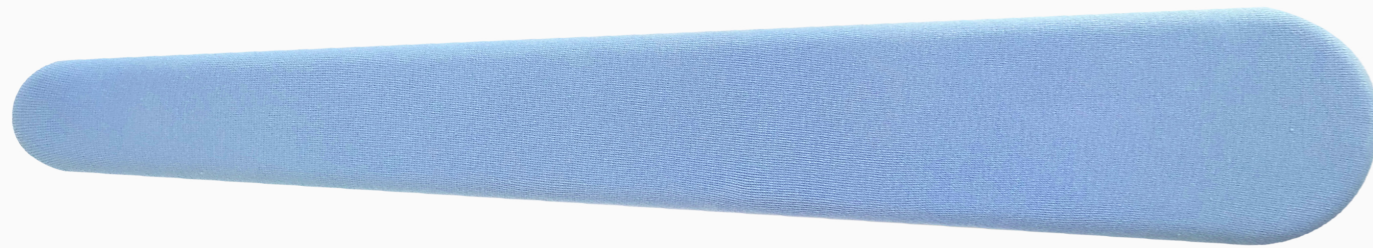

About the product

Purpose: carrying out wet heat treatment of hard-to-reach areas; stagnation and ironing of seams.

Material: solid wood pine. Quickly picks up steam and presses seams and any shapes.

Dimensions: 29cm (length) * 9cm (width) * 12.5cm (height)

Unpacked weight: 0.57 kg

Sleeve

About the product

Purpose: carrying out steam treatment of sleeves, trousers, relief seams.

Base material: solid wood pine, filling - synthetic. It removes steam and presses seams and any shapes.

Cover material: jersey.

Dimensions: 68cm (length) * 12cm (width) * 19cm (height)

Unpacked weight: 1.85 kg

Cup

About the product

Purpose: steam treatment of darts, bra cups, corset, bodice.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. You can inject needles into the bra / corset / bodice cup filler.

Cover material: jersey.

Dimensions: 13cm (width) * 10cm (height)

Unpacked weight: 0.25 kg

Bust

(small)

About the product

Purpose: carrying out steam treatment of darts, reliefs, bra cups, corset, bodice.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 28.5cm (length) * 9cm (width) * 11cm (height)

Unpacked weight: 0.47 kg

Bust

(large)

About the product

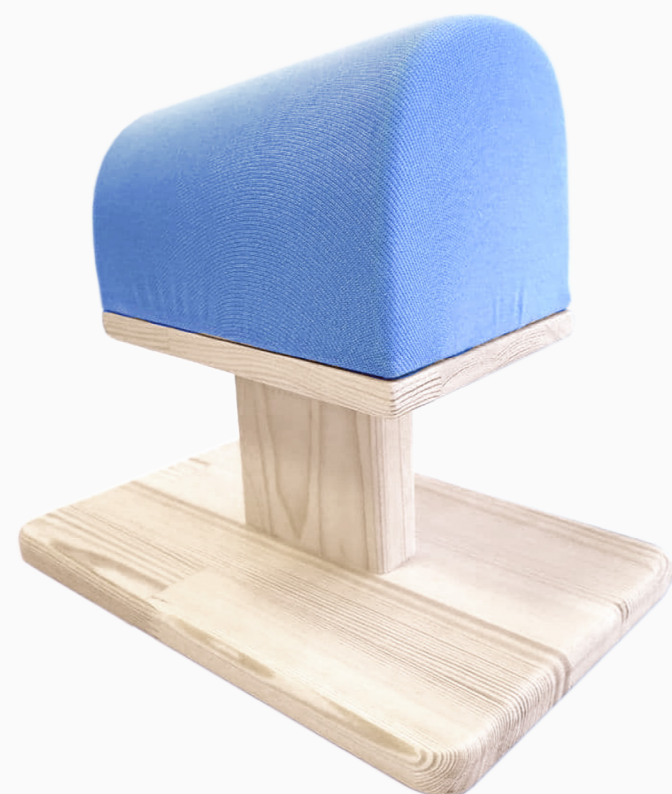

Purpose: carrying out steam treatment of darts, reliefs, bra cups, corset, bodice.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 36cm (length) * 12cm (width) * 15cm (height)

Unpacked weight: 0.77 kg

Shoulder

(large)

About the product

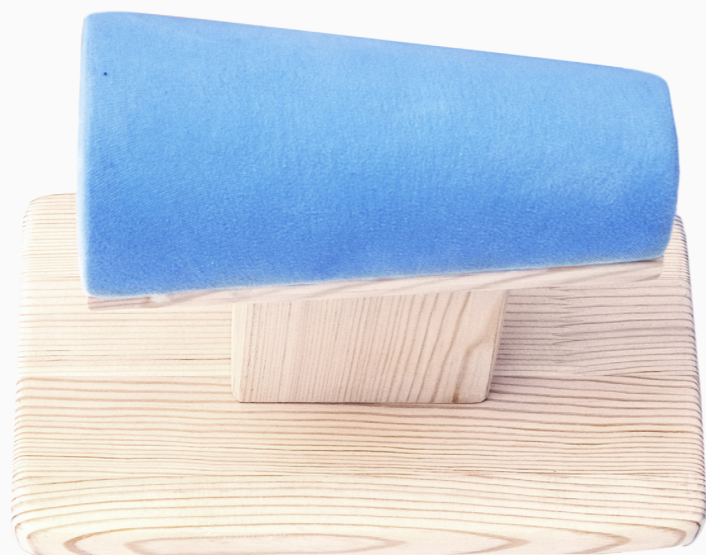

Purpose: steam treatment of the sleeve, shoulder seams.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 30cm (length) * 19.5cm (width) * 26cm (height)

Unpacked weight: 1.18 kg

Shoulder

(small)

About the product

Purpose: steam treatment of the sleeve, shoulder seams.

Base material: solid wood pine, filling - polyurethane foam. It removes steam and presses seams and any shapes. Needles can be injected into the molding filler.

Cover material: jersey.

Dimensions: 26cm (length) * 15cm (width) * 21cm (height)

Unpacked weight: 0.79 kg

Iron (medium)

About the product

Purpose: Ironing seams on different parts of the product

Stitching the seams

Material: solid beech furniture board. The wood quickly picks up steam and press-
in the seams

Dimensions: 27.5cm (length) * 9cm (width) * 4cm (height)

Unpacked weight: 0.6 kg

Iron

(small)

About the product

Purpose: Ironing seams on different parts of the product
Stitching the seams

Material: solid beech furniture board. The wood picks up steam quickly and presses the seams

Dimensions: 20cm (length) * 9cm (width) * 4cm (height)

Unpacked weight: 0.42 kg
